DETAILS

- Built on TRUE STRENGTH® Platform to Offer Durability and Precision Adjustment; Completely Sealed, Shockproof, Fogproof and Rainproof
- Intuitive Quick to Acquire Red/Green T-Dot Reticle for Swift Execution of T-Zone and Center Mass Hits with Fine Adjustment Rheostat for Variable Intensity Adjustment
- Great Field of View, Unlimited Eye Relief, and Featuring a Non-reflective Emerald Coated Lens
- Optimal Height to Co-witness with Iron Sights Using Included Riser Adaptor
- Offset and Center Height Adjustable, Easily Adapts to Both the Shooter and Firearm
- Aids in Intuitively Acquiring Targets, Enhancing Shooting Accuracy, Speed, and Overall Performance
- Versatile Towards for a Wide Variety of Different Firearms Applications

- Complete with Flip-open Lens Caps and Picatinny Quick Detach Lever Lock Mounting Base
- US PAT. 8397421

T-DOT RETICLE

The T-dot reticle is ideally used for fast center mass and T-zone aiming applications where getting shots on target quickly is a priority. The reticle consists of a single floating dot in the center as the aiming point with three floating posts arranged at the dot's 3,6, and 9 O'clock positions. It may be permanently etched on glass or formed by light reflection. The posts are very quickly picked up by the eye, framing your target, while the single dot provides precision aiming of the area of interest on the target.

RG

INNOVATIVE TRUE STRENGTH TS PLATFORM

HISTORY DEVELOPMENT & TECHNOLOGY

TS, as in True Strength®, is the signature scope construction platform of Leapers UTG® optics. As the name suggests, no matter if it's a full size or compact scope, magnifier or dot sight, we aim to achieve the highest dependability starting at the heart of our scopes' structure. The research and development of this innovative structure was initiated in 2001 and in 2002 the first TS Platform scope was put into mass production. With our continuous testing, verification, and multiple rounds of improvement, we started promoting and selling TS optics on a global scale in 2005. Today, all our optics are built on the tough TS Platform to include a one-piece integral aluminum main tube, meticulously placed reinforcements at key structural points, and nitrogen purging to achieve optimal rainproof, fogproof, and shockproof performance even in the most challenging of scenarios. This superior TS Platform has even been adopted into the lineup of UTG® laser products, giving them precise and secure adjustment.

SMART SPHERICAL STRUCTURE

- The Smart Spherical Structure (SSS) is one of the most significant characteristics of the TS Platform.
- SSS simulates the human joint structure to achieve the utmost precision and reliability.
- The erector tube is constrained via a ball and socket structural relationship, which provides the desirable flexibility to respond to windage and elevation adjustments and the optimal ability to hold zero under heavy recoil.

TRUE STRENGTH® PLATFORM

- Reduces and Absorbs Recoil, Alleviating Potential Loss of Zero
- Fully Tested on Both Air Rifles and Firearms
- TS Technology Implemented in Every Leapers Scope

ADVANCED RECOIL PROOF SYSTEM

- The Most Advanced and User-friendly Windage and Elevation Adjustment System with Innovative Design, Precision Components, and Disciplined Assembly
- UTG®'s Leaf Spring System is Made from a Special Heat Treated Beryllium Bronze Alloy to Maintain Reliable and Consistent Long Term Tension
- ACCUSHOT® Models Equipped with a Rugged Coil Erector Return Spring System For Improved Zero Hold Under Heavy Recoil and Greater Windage/ Elevation Adjustment Range

ACCESSORIES INCLUDED

- Removable Riser & QD Level Lock Mount Base
- Allen Wrench 2.5mm
- Allen Wrench 1.5mm
- Flip-open Lens Caps
- CR1620 3V High Energy Lithium Battery
- M5x10 Phillips Screw
- Cleaning Cloth
- User Manual
